Session: 001 (solo)

### Summary of Information

Response to site tasking produced impressions of a very large, white, red-roofed structure, which was "porticoed," several-floored, highly secure, surrounded by a substantial white wall, set in a well-kept, landscaped setting with lawn, trees, and a curving area in front "like" a drive-way. There is both an institutional and private sense about this location. Inside it is dim, cool, sparsely furnished, orderly, white, with various floors and rooms. Somehow connected with this location is another enclosed area that is larger, definitely not landscaped, which is drab and a little depressing. There are several large, several-floored, oblong structures of concrete, with regular rows of windows. Long, unadorned halls stretch through these structures, and the whole is surrounded by an elaborate wire fence or similar barrier. Brief image was perceived of numerous like-clothed people lying on the floor within a closed-in space. A/S of "compound," "facility," and "confinement."
